

## How2Setup

Thank you for choosing our online configurator **Upgradebox**. In order to implement it onto your website, please answer the following questions:

1. Are you able to provide a deep link that leads to the shopping basket or product information page of your web system?  
 ("[ARTICLE]" is a placeholder for the article number send back to your web system. Your session variables (see question 3) will be appended to this link.)

HTTP form variables sent method?       POST       GET

2. Which target frame should this deep link adress?

3. If your web system uses session variables please provide a list of comma separated variables to maintain by the **Upgradebox** during the users configuration session and to send back with the deep link into your web system (e.g. sessionid, customerid, phpsession...)

4. Is this deeplink able to target the manufacturer SKU or EAN code?

SKU       EAN       neither

5. If your web system is not able to target the manufacturer SKU or the EAN code: Are you able to provide a list with a comparison of your SKUs and the manufacturer SKUs (XLS or CSV preferred)?\*

none needed     CSV       TAB       XLS

6. If an article is not available according to your comparison list, are you able to provide a separate deep link or an email adress for a customer request or do you want to handle missing articles in your own web system? This feature only works when you provide us with your comparison list (see question 5)!  
 (Please use "[ARTICLE]" again as a placeholder for the article number send back to your web system (see question 1 for an example).)

link       email       handle in our own system

\* Setup and maintenance will require a monthly fee!

7. Do you want to use the **Upgradebox** database via our APIs in your own system environment? \*\*

API access required \*\*

8. Which languages do you want to use for the **Upgradebox** and how should the links back to your web system be named for the customer?  
(example "Price & Availability", "In den Warenkorb")

- |                                     |                      |
|-------------------------------------|----------------------|
| <input type="checkbox"/> English    | <input type="text"/> |
| <input type="checkbox"/> German     | <input type="text"/> |
| <input type="checkbox"/> French     | <input type="text"/> |
| <input type="checkbox"/> Italian    | <input type="text"/> |
| <input type="checkbox"/> Dutch      | <input type="text"/> |
| <input type="checkbox"/> Spanish    | <input type="text"/> |
| <input type="checkbox"/> Portuguese | <input type="text"/> |
| <input type="checkbox"/> Polish     | <input type="text"/> |
| <input type="checkbox"/> Czech      | <input type="text"/> |
| <input type="checkbox"/> Ukrainian  | <input type="text"/> |
| <input type="checkbox"/> Danish     | <input type="text"/> |
| <input type="checkbox"/> Swedish    | <input type="text"/> |

9. Do you want to restrict the **Upgradebox** Configurator to the models of some named system manufacturers (e.g. Dell, Apple, HP, Acer...)?

\*\* API usage might require a monthly fee, depending on the access level required!

10. Please choose from the available product manufacturers.  
Please uncheck the manufacturers you do not want to be presented in your **Upgradebox**.
