To whom it may concern,

In response to some recent queries regarding Lithium-Ion batteries, BTI is pleased to provide the following information

Q: Is BTI shipping lithium-metal-batteries containing more than 2g lithium?

A: BTI does not ship any Lithium Metal batteries

Q: Is BTI shipping lithium-ion-batteries with more than 100Wh (class of dangerous goods 9)?

A: No. All BTI Lithium-Ion batteries are less than 100Whr – Max, 97.7 Whr.

Q: Please provide a list of which batteries are shipped single, which are in and which are with a device (188 ADR / IMDG-Code Packaging Regulation 965 - 970 IATA-DGR)?

A: All BTI batteries are sold as stand-alone units. They are not shipped in, or with any other device.

Q: Confirmation is needed that a packed battery, which is not in a device, can endure a fall from a height of 1.20m.

A: BTI batteries are packed in an inner box, then in an outer box with protective padding. They have been tested to endure a fall of 1.20m.

I hope that the above answers your queries satisfactorily, and if you have any further questions, please contact me.

Yours sincerely

Hayden Leung – VP of Operations
For Battery Technology Incorporated
